

CONTENTS OF VOLUME 43

- No. 1 (pp 1–194) published April 1995
- No. 2 (pp 195–388) published May/June 1995
- No. 3 (pp 389–578) published July 1995
- No. 4 (pp 579–770) published August/September 1995
- No. 5 (pp 771–960) published October 1995
- No. 6 (pp 961–1142) published November 1995

- Abbad Andaloussi S, Talbaoui H, Marczak R, Bonaly R: Isolation and characterization of exocellular polysaccharides produced by *Bifidobacterium longum* 995
- Acuña-Argüelles ME, Gutiérrez-Rojas M, Viniegra-González G, Favela-Torres E: Production and properties of three pectinolytic activities produced by *Aspergillus niger* in submerged and solid-state fermentation 808
- Ahmed HK, Mitchell WJ, Priest FG: Regulation of mosquito-cidal toxin synthesis in *Bacillus sphaericus* 310
- Ahring BK, Sandberg M, Angelidaki I: Volatile fatty acids as indicators of process imbalance in anaerobic digestors 559
- Al-Asheh S, Duvnjak Z: The effect of phosphate concentration on phytase production and the reduction of phytic acid content in canola meal by *Aspergillus carbonarius* during a solid-state fermentation process 25
- Ascón-Cabrera MA, Lebeault J-M: Interfacial area effects of a biphasic aqueous/organic system on growth kinetic of xenobiotic-degrading microorganisms 1136
- Babu GRV, Wolfram JH, Marian JM, Chapatwala KD: *Pseudomonas marginalis*: its degradative capability on organic nitriles and amides 739
- Banerjee DK, Fedorak PM, Hashimoto A, Masliyah JH, Pickard MA, Gray MR: Monitoring the biological treatment of anthracene-contaminated soil in a rotating-drum bioreactor 521
- Barbiero F, Camarasa-Claret C, Grivet JP, Bories A: Glycerol fermentation by a new 1,3-propanediol-producing microorganism: *Enterobacter agglomerans* 786
- Barjau M, Druet D, Comeau L-C: Purification and partial characterization of phytotoxic glycopeptides secreted by *Colletotrichum gloeosporioides* 217
- Barrasa JM, Camarero S, Martínez AT, Ruel K: Ultrastructural aspects of wheat straw degradation by *Phanerochaete chrysosporium* and *Trametes versicolor* (Short contribution) 766
- Barron N, Marchant R, McHale L, McHale AP: Studies on the use of a thermotolerant strain of *Kluyveromyces marxianus* in simultaneous saccharification and ethanol formation from cellulose 518
- Bender H: Purification and characterization of a soluble, cytoplasmic decycling maltodextrinase from a *Lactobacillus* species, strain 26X, isolated from kitchen waste water 838
- Bhuiyan MZA, Ueda K, Inouye Y, Sugiyama M: Molecular cloning and expression in *Escherichia coli* of bleomycin-resistance gene from a methicillin-resistant *Staphylococcus aureus* and its association with IS431 mec 65
- Blackwell KJ, Singleton I, Tobin JM: Metal cation uptake by yeast: a review 579
- Bohmann A, Pörtner R, Märkl H: Performance of a membrane-dialysis bioreactor with a radial-flow fixed bed for the cultivation of a hybridoma cell line 772
- Borja R, Banks CJ, Wang Z: Performance of a hybrid anaerobic reactor, combining a sludge blanket and a filter, treating slaughterhouse wastewater 351
- Bouchez M, Blanchet D, Vandecasteele J-P: Degradation of polycyclic aromatic hydrocarbons by pure strains and by defined strain associations: inhibition phenomena and cometabolism 156
- Bouchez M, Blanchet D, Vandecasteele J-P: Substrate availability in phenanthrene biodegradation: transfer mechanism and influence on metabolism 952
- Brunsbach FR, Reineke W: Degradation of mixtures of chloroaromatic compounds in soil slurry by mixed cultures of specialized organisms 529
- Cabras P, Garau VL, Angioni A, Farris GA, Budroni M, Spanedda L: Interactions during fermentation between pesticides and oenological yeasts producing H₂S and SO₂ 370
- Cartwright DK, Chilton WS, Benson DM: Pyrrolnitrin and phenazine production by *Pseudomonas cepacia*, strain 5.5B, a biocontrol agent of *Rhizoctonia solani* 211
- Chaabouni SE, Belguith H, Hassairi I, M'Rad K, Ellouz R: Optimization of cellulose production by *Penicillium occitanis* (Short contribution) 267
- Chang SY, Li CT, Hsiang SY, Chang MC: Intracellular protoplast fusion of *Candida tropicalis* for enhancing phenol degradation 534
- Chaudhuri BK, Wiesmann U: Enhanced anaerobic degradation of benzene by enrichment of mixed microbial culture and optimization of the culture medium 178
- Cheng YR, Fang A, Demain AL: Effect of amino acids on rapamycin biosynthesis by *Streptomyces hygroscopicus* 1096
- Choi K-P, Molnár I, Murooka Y: Secretory overproduction of *Arthrobacter simplex* 3-ketosteroid Δ^1 -dehydrogenase by *Streptomyces lividans* with a multi-copy shuttle vector 1044
- Colón GE, Nguyen TT, Jetten MSM, Sinskey AJ, Stephanopoulos G: Production of isoleucine by overexpression of *ilvA* in a *Corynebacterium lactofermentum* threonine producer 482
- Compagno C, Porro D, Smeraldi C, Ranzi BM: Fermentation of whey and starch by transformed *Saccharomyces cerevisiae* cells (Short contribution) 822
- Cooney MJ, McDonald KA: Optimal dynamic experiments for bioreactor model discrimination 826
- Csikó Z, Miháitz P, Czákó L, Holló J: A pressure test method monitors biofilm coated particle fluidization (Short contribution) 383
- da Silva GA: Evaluation of butanoic, pentanoic and hexanoic acids as internal standards for analysis of acidic fermentation end-products from *Bacillus stearothermophilis* by gas-liquid chromatography 626
- Delcourt F, Taillandier P, Vidal F, Strehaieno P: Influence of pH, malic acid and glucose concentrations on malic acid consumption by *Saccharomyces cerevisiae* 321
- Demirci A, Pometto III AL: Repeated-batch fermentation in biofilm reactors with plastic-composite supports for lactic acid production 585
- de Moraes LMP, Astolfi-filho S, Oliver SG: Development of yeast strains for the efficient utilisation of starch: evaluation of constructs that express α -amylase and glucoamylase separately or as bifunctional fusion proteins 1067
- Dick RE, Quinn JP: Glyphosate-degrading isolates from environmental samples: occurrence and pathways of degradation 545
- Dickinson JR, Wingfield JM, Mason DJ: *CEN14* sequences cause slower proliferation, reduced cell size and sporogony in *Saccharomyces cerevisiae* (Short contribution) 877

- Doherty Speirs E, Halling PJ, McNeil B: The importance of bead size measurement in mass-transfer modelling with immobilised cells 440
- Elibol M, Mavituna F: Effect of perfluorodecalin as an oxygen carrier on actinorhodin production by *Streptomyces coelicolor* A3(2) 206
- Emery AN, Jan DC-H, Al-Rubeai M: Oxygenation of intensive cell-culture system 1028
- Ernst C, Rehm H-J: Development of a continuous system for the degradation of a cyanuric acid by adsorbed *Pseudomonas* sp. NRRL B-12228 150
- Fábregas J, Patiño M, Vecino E, Cházaro F, Otero A: Productivity and biochemical composition of cyclostat cultures of the marine microalga *Tetraselmis suecica* 617
- Fass R, Bahar S, Kaufman J, Shiloach J: High-yield production of diphtheria toxin mutants by high-density culture of C7(β)^{tox+} strains grown in a non-deferrated medium 83
- Faulds CB, Williamson G: Release of ferulic acid from wheat bran by a ferulic acid esterase (FAE-III) from *Aspergillus niger* 1082
- Fava F, Armenante PM, Kafkewitz D, Marchetti L: Influence of organic and inorganic growth supplements on the aerobic biodegradation of chlorobenzoic acids 171
- Ferreira H, Barrientos FJA, Baldini RL, Rosato YB: Electrotransformation of three pathovars of *Xanthomonas campestris* 651
- Fliss I, St-Laurent M, Emond E, Simard RE, Lemieux R, Ettriki A, Pandian S: Anti-DNA-RNA antibodies: an efficient tool for non-isotopic detection of *Listeria* species through a liquid-phase hybridization assay 717
- Fontes MGA, Hall J, Hirst BH, Hazlewood GP, Gilbert HJ: The resistance of cellulases and xylanases to proteolytic inactivation 52
- Fradette S, Rho D, Samson R, LeDuy A: Microcalorimetry as a diagnostic and analytical tool for the assessment of biodegradation of 2,4-D in a liquid medium and in soil 387
- Franzosi G, Battistel E, Gagliardi I, Van der Goes W: Screening and characterization of microorganisms with glutaryl-7ADCA acylase activity 508
- Frølund B, Griebbe T, Nielsen PH: Enzymatic activity in the activated-sludge floc matrix 755
- Fu MH, Alexander M: Use of surfactants and slurring to enhance the biodegradation in soil of compounds initially dissolved in nonaqueous-phase liquids 551
- Galar ML, Boiardi JL: Evidence for a membrane-bound pyrroloquinoline quinone-linked glucose dehydrogenase in *Acetobacter diazotrophicus* 713
- Gatzke R, Weydemann U, Janowicz ZA, Hollenberg CP: Stable multicopy integration of vector sequences in *Hansenula polymorpha* 844
- Gerritse J, Renard V, Visser J, Gottschal JC: Complete degradation of tetrachloroethene by combining anaerobic dechlorinating and aerobic methanotrophic enrichment cultures 920
- Gitter B, Diefenbach R, Kewelow H, Riesenberger D: Influence of stringent and relaxed response on excretion of recombinant proteins and fatty acid composition in *Escherichia coli* (Short contribution) 89
- Gordillo MA, Obradors N, Montesinos JL, Valero F, Lafuente J, Solà C: Stability studies and effect of the initial oleic acid concentration on lipase production by *Candida rugosa* (Short contribution) 38
- Green M, Schnitzer M, Tarre S: Kinetics of a fluidized-bed reactor for ground-water denitrification 188
- Gu Y, Korus RA: Kinetics of pentachlorophenol degradation by a *Flavobacterium* species 374
- Guillouet S, Engasser JM: Sodium and proline accumulation in *Corynebacterium glutamicum* as a response to an osmotic saline upshock 315
- Guyot J-P, Ferrer H, Florina R: Methane production from acetamide in an upflow anaerobic sludge-blanket reactor based on a synergistic association between an aerobic rod and methanogens 1107
- Haapala R, Parkkinen E, Suominen P, Linko S: Production of extracellular enzymes by immobilized *Trichoderma reesei* in shake flask cultures 815
- Hantula J, Bamford DH: Dependence of flocculation on aggregate formation and buoyant density in *Flavobacterium* sp. 137
- Havel J, Reineke W: The influence of physicochemical effects on the microbial degradation of chlorinated biphenyls 914
- Healy FG, Ray RM, Aldrich HC, Wilkie AC, Ingram LO, Shanmugam KT: Direct isolation of functional genes encoding cellulases from the microbial consortia in a thermophilic, anaerobic digester maintained on lignocellulose 667
- Hellmuth K, Pluschkell S, Jung J-K, Rutkowski E, Rinas U: Optimization of glucose oxidase production by *Aspergillus niger* using genetic- and process-engineering techniques 978
- Hensing MCM, Bangma KA, Raamsdonk LM, de Hulster E, van Dijken JP, Pronk JT: Effects of cultivation conditions on the production of heterologous α -galactosidase by *Kluyveromyces lactis* 58
- Hertzberg S, Moen E, Vogelsang C, Østgaard K: Mixed photo-cross-linked polyvinyl alcohol and calcium-alginate gels for cell entrapment 10
- Hilton MG, Jay A, Rhodes MJC, Wilson PDG: Growth and monoterpene production by transformed shoot cultures of *Mentha citrata* and *Mentha piperita* in flasks and fermenters 452
- Hooijmans CM, Abidin TA, Alaerts GJ: Quantification of viable biomass in biofilm reactors by extractable lipid phosphate 781
- Hoq MM, Deckwer W-D: Cellulase-free xylanase by thermophilic fungi: a comparison of xylanase production by two *Thermomyces lanuginosus* strains 604
- Inyang CU, Gebhart U, Obi SKC, Bisswanger H: Isolation and characterization of a D-glucose/xylose isomerase from a new thermophilic strain *Streptomyces* sp. (PLC) 632
- Itoh N, Kusaka M, Hirota T, Nomura A: Microbial production of antibiotic fosfomycin by a stereoselective epoxidation and its formation mechanism 394
- Jetten MSM, Follettie MT, Sinskey AJ: Effect of different levels of aspartokinase on the lysine production by *Corynebacterium lactofermentum* 76
- Jørgensen H, Nielsen J, Villadsen J, Møllgaard H: Analysis of Penicillin V biosynthesis during fed-batch cultivations with a high-yielding strain of *Penicillium chrysogenum* 123
- Kästner M, Lotter S, Heerenklage J, Breuer-Jammali M, Stegmann R, Mahro B: Fate of ¹⁴C-labeled anthracene and hexadecane in compost-manured soil 1128
- Kataoka M, Shimizu K, Sakamoto K, Yamada H, Shimizu S: Optical resolution of racemic pantolactone with a novel fungal enzyme, lactonohydrolase 974
- Kato Y, Asano Y: 3-Methylaspartate ammonia-lyase from a facultative anaerobe, strain YG-1002 901
- Katoh S, Terashima M, Kouno M: Purification of recombinant α -amylase by immunoaffinity chromatography with anti-peptide antibody 871
- Kazumi J, Häggblom MM, Young LY: Diversity of anaerobic microbial processes in chlorobenzoate degradation: nitrate, iron, sulfate and carbonate as electron acceptors 929
- Klotz MG, Kim YC, Katsuwon J, Anderson AJ: Cloning, characterization and phenotypic expression in *Escherichia coli* of *catF*, which encodes the catalytic subunit of catalase isozyme CatF of *Pseudomonas syringae* 656
- Kobayashi T, Hakamada Y, Adachi S, Hitomi J, Yoshimatsu T, Koike K, Kawai S, Ito S: Purification and properties of an alkaline protease from alkalophilic *Bacillus* sp. KSM-K16 473
- Kondo A, Urabe T: Relationships between molecular states (conformation and orientation) and activities of α -amylase adsorbed on ultrafine silica particles 801

- Kourteva Y, Stefanova L, Konova O, Peretz V, Venkov C: Bio-synthesis of extracellular low-molecular-mass papain and trypsin inhibitors by *Streptomyces* sp. 22: effect of cultural conditions 131
- Labare MP, Alexander M: Microbial cometabolism of sucralose, a chlorinated disaccharide, in environmental samples 194
- Larroche C, Creuly C, Gros J-B: Fed-batch biotransformation of β -ionone by *Aspergillus niger* 222
- Lawson S, Macy JM: Bioremediation of selenite in oil refinery wastewater 762
- Lee H-W, Pan J-G, Lebeault J-M: Characterisation of kinetic parameters and metabolic transition of *Corynebacterium glutamicum* on L-lysine production in continuous culture 1019
- Lee S-G, Lee D-C, Hong S-P, Sung M-H, Kim H-S: Thermostable D-hydantoinase from thermophilic *Bacillus stearotherophilus* SD-1: characteristics of purified enzyme 270
- Lejeune R, Baron GV: Effect of agitation on growth and enzyme production of *Trichoderma reesei* in batch fermentation 249
- Lelieveld HLM, Bachmayer H, Boon B, Brunius G, Bürki K, Chmiel A, Collins CH, Crooy P, Doblhoff-Dier O, Economidis I, Elmqvist A, Frommer W, Frontali-Botti C, Havenaar R, Haymerle H, Hussey C, Käppeli O, Lex M, Lund S, Mahler JL, Marris R, Mosgaard Ch, Normand-Plessier C, Rudan F, Simon R, Logtenberg MTh, Werner RG: Safe biotechnology. Part 6. Safety assessment, in respect of human health, of microorganisms used in biotechnology 389
- Lepistö R, Rintala JA: Acetate treatment in 70°C upflow anaerobic sludge-blanket (UASB) reactors: start-up with thermophilic inocula and the kinetics of the UASB sludges 1001
- Lezinou V, Christakopoulos P, Li L-W, Kekos D, Macris BJ: Study of a single and mixed culture for the direct bioconversion of sorghum carbohydrates to ethanol 412
- Li L, Freier TA, Hartman PA, Young JW, Beitz DC: A resting-cell assay for cholesterol reductase activity in *Eubacterium coprostanoligenes* ATCC 51222 887
- Liao C-W, Hsueh T-H, Hwang J: A target-specific chimeric toxin composed of epidermal growth factor and *Pseudomonas* exotoxin A with a deletion in its toxin-binding domain 498
- Lidén G, Persson A, Gustafsson L, Niklasson C: Energetics and product formation by *Saccharomyces cerevisiae* grown in anaerobic chemostats under nitrogen limitation 1034
- Limbirt ESB, Betts WB: Kinetics of bio-oxidation of a medium comprising phenol and a mixture of organic contaminants 165
- Lin TF, Demail AL: Negative effect of ammonium nitrate as nitrogen source on the production of water-soluble red pigments by *Monascus* sp. 701
- Lindsay SE, Bothast RJ, Ingram LO: Improved strains of recombinant *Escherichia coli* for ethanol production from sugar mixtures 70
- Liu SM, Jones WJ: Biotransformation of dichloroaromatic compounds in nonadapted and adapted freshwater sediment slurries 725
- Mackie RI, Bryant MP: Anaerobic digestion of cattle waste at mesophilic and thermophilic temperatures 346
- Mahajan G, Kamat M: γ -Linolenic acid production from *Spirulina platensis* (Short contribution) 466
- Masuda M, Odake H, Miura K, Oba K: Biodegradation of 2-sulfonyl fatty acid methyl ester (α -SFMe): Identification of microorganisms isolated from activated sludge and their capability for degrading α -SFMe (Short contribution) 379
- Matsuoka H, Yang H-C, Homma T, Nemoto Y, Yamada S, Sumita O, Takatori K, Kurata H: Use of Congo red as a microscopic fluorescence indicator of hyphal growth 102
- Meier-Schneiders M, Grosshans U, Busch C, Eigenberger G: Biocalorimetry-supported analysis of fermentation processes 431
- Meyer-Jens T, Matz G, Märkl H: On-line measurement of dissolved and gaseous hydrogen sulphide in anaerobic biogas reactors 341
- Milner JL, Raffel SJ, Lethbridge BJ, Handelsman J: Culture conditions that influence accumulation of zwittermixin A by *Bacillus cereus* UW85 685
- Molinari F, Marianelli G, Aragozzini F: Production of flavour esters by *Rhizopus oryzae* 967
- Molinari FM, Villa R, Manzoni M, Aragozzini F: Aldehyde production by alcohol oxidation with *Gluconobacter oxydans* 989
- Morin A, Tran Trung NH, LaPointe G, Dubeau H: Conditions used with a continuous cultivation system to screen for D-hydantoinase-producing microorganisms 259
- Müller R, Wagener A, Schmidt K, Leistner E: Microbial production of specifically ring- 13 C-labelled 4-hydroxybenzoic acid 985
- Müller S, Lösche A, Bley T, Scheper T: A flow cytometric approach for characterization and differentiation of bacteria during microbial processes 93
- Nakagawa S, Hagihara T, Fujio T, Aisaka K: Metaphosphate-dependent phosphorylation of riboflavin to FMN by *Corynebacterium ammoniagenes* 325
- Nakamura N, Kumazawa S, Matsunaga T: In vitro electrochemical detection of wheat allergen using rat basophilic leukaemia (RBL-1) cells 622
- Natarajan MR, Wang H, Hickey R, Bhatnagar L: Effect of oxygen and storage conditions on the metabolic activities of polychlorinated biphenyls dechlorinating microbial granules 733
- Niersbach H, Kühne A, Tischer W, Weber M, Wedekind F, Plapp R: Improvement of the catalytic properties of penicillin G acylase from *Escherichia coli* ATCC 11105 by selection of a new substrate specificity 679
- Norton S, Watson K, D'Amore T: Ethanol tolerance of immobilized brewers' yeast cells 18
- Nowak C, Radzio R, Kück U: DNA-mediated transformation of a fungus employing a vector devoid of bacterial DNA sequences (Short contribution) 1077
- Öhman L, Ljunggren J, Hågström L: Induction of a metabolic switch in insect cells by substrate-limited fed batch cultures 1006
- Örlygsson J, Houwen FP, Svensson BH: Thermophilic anaerobic amino acid degradation: deamination rates and end-product formation 235
- Ogawa J, Miyake H, Shimizu S: Purification and characterization of N-carbamoyl-L-amino-acid amidohydrolase with broad substrate specificity from *Alcaligenes xylosoxidans* 1039
- O'Mullan PJ, Buchholz E, Chase Jr T, Eveleigh DE: Roles of alcohol dehydrogenases of *Zymomonas mobilis* (ZADH): characterization of a ZADH-2-negative mutant 675
- Overmeyer C, Rehm H-J: Biodegradation of 2-chloroethanol by freely suspended and adsorbed immobilized *Pseudomonas putida* US2 in soil 143
- Pabai F, Kermasha S, Morin A: Lipase from *Pseudomonas fragi* CRDA 323: Partial purification, characterization and interestification of butter fat 42
- Padukone N, Evans KW, McMillan JD, Wyman CE: Characterization of recombinant *E. coli* ATCC 11303 (pLOI 297) in the conversion of cellulose and xylose to ethanol 850
- Patterson GML, Bolis CM: Regulation of scytopycin accumulation in cultures of *Scytonema ocellatum*. II. Nutrient requirements 692
- Pauli AS-L, Kaitala S: Optimal growth conditions for *Acinetobacter* isolates from activated sludge treating forest-industry wastewaters 746
- Pazirandeh M, Chrisey LA, Mauro JM, Campbell JR, Gaber BP: Expression of the *Neurospora crassa* metallothionein gene in *Escherichia coli* and its effect on heavy-metal uptake 1112
- Plihan F, Taillandier P, Strehaiano P: Oxygen effect on batch cultures of *Leuconostoc mesenteroides*: relationship between oxygen uptake, growth and end-products 117

- Poch MT, Somkuti GA: Isolation of *SagI*, a new *HaeII* isoschizomer from *Streptococcus agalactiae* 282
- Poncelet D, Poncelet De Smet B, Beaulieu C, Huguet ML, Fournier A, Neufeld RJ: Production of alginate beads by emulsification/internal gelation. II. Physicochemistry 644
- Puranik PR, Chabukwar NS, Paknikar KM: Cadmium biosorption by *Streptomyces pimprina* waste biomass 1118
- Reu JC de, Griffiths AM, Rombouts FM, Nout MJR: Effect of oxygen and carbon dioxide on germination and growth of *Rhizopus oligosporus* on model media and soya beans 908
- Riedel K, Beyersdorf-Radeck B, Neumann B, Schaller F: Microbial sensors for determination of aromatics and their chloro derivatives. Part III: Determination of chlorination phenols using a biosensor containing *Trichosporon beigelii* (*cutaneum*) 7
- Rodrigues MFA, Silva LF da, Gomez JGC, Valentin HE, Steinbüchel A: Biosynthesis of poly (3-hydroxybutyric acid co-3-hydroxy-4-pentenoic acid) from unrelated substrates by *Burkholderia* sp. 880
- Sable S, Lortal S: The lysins of bacteriophages infecting lactic acid bacteria 1
- Sajc L, Vunjak-Novakovic G, Grubisic D, Kovačević N, Vuković D, Bugarski B: Production of anthraquinones by immobilized *Fragula alnus* Mill. plant cells in a fourphase air-lift bioreactor 416
- Salgueiro Machado S, Luttik MAH, van Dijken JP, Jongejan JA, Pronk JT: Regulation of alcohol-oxidizing capacity in chemostat cultures of *Acetobacter pasteurianus* 1061
- Sand W, Gerke T, Hallmann R, Schippers A: Sulfur chemistry, biofilm, and the (in)direct attack mechanism – a critical evaluation of bacterial leaching 961
- Sathyamoorthy M, Speedie MK: Monitoring transport of a recombinant phosphotriesterase in *Streptomyces lividans* using a pulse-chase system 493
- Sawada H, Iwasa S, Nishimura O, Kitano K: Efficient production of anti-(hepatitis B virus) antibodies and their neutralizing activity in chimpanzees 445
- Schick I, Haltrich D, Kulbe KD: Trehalose phosphorylase from *Pichia fermentans* and its role in the metabolism of trehalose 1088
- Schmidt O, Angermann H, Frommhold-Treu I, Hoppe K: Experimental and theoretical investigations of submerged fermentation and synthesis of pectinolytic enzymes by *Aspergillus niger* 424
- Schrickx JM, Stouthamer AH, van Verseveld HW: Growth behaviour and glucoamylase production by *Aspergillus niger* N402 and a glucoamylase overproducing transformant in recycling culture without a nitrogen source 109
- Schwarz WH, Bronnenmeier K, Krause B, Lottspeich F, Staudenbauer WL: Debranching of arabinoxylan: properties of the thermoactive recombinant α -L-arabinofuranosidase from *Clostridium stercoreum* (ArfB) 856
- Shabtai Y, Mukmenev I: Enhanced production of pigment-free pullulan by a morphogenetically arrested *Aureobasidium pullulans* (ATCC 42023) in a two-stage fermentation with shift from soy bean oil to sucrose 595
- Shipanova I, Bartoshevich Y, Sibeldina L, Zaslavskaya P, Michtchenko A: Relationship between intracellular pH and antibiotic biosynthesis in *Fusidium coccineum* 514
- Silverman KC, Cascales C, Genilloud O, Sigmund JM, Gartner SE, Koch GE, Gagliardi MM, Heimbuch BK, Nallin-Omstead M, Sanchez M, Diez MT, Martin I, Garrity GM, Hirsch CF, Gibbs JB, Singh SB, Lingham RB: Actinoplanic acids A and B as novel inhibitors of farnesyl-protein transferase 610
- Skjerdal OT, Sletta H, Flenstad SG, Josefsen KD, Levine DW, Ellingsen T: Changes in cell volume, growth and respiration rate in response to hyperosmotic stress of NaCl, sucrose and glutamic acid in *Brevibacterium lactofermentum* and *Corynebacterium glutamicum* 1099
- Slininger PJ, Shea-Wilbur MA: Liquid-culture pH, temperature, and carbon (not nitrogen) source regulate phenazine productivity of the take-all biocontrol agent *Pseudomonas fluorescens* 2-79 794
- Solaiman DKY, Somkuti GA: Expression of *cho* and *melC* operons by a *Streptococcus thermophilus* synthetic promoter in *Escherichia coli* 285
- Sonezaki S, Ishii Y, Okita K, Sugino T, Kondo A, Kato Y: Overproduction and purification of *SulA* fusion protein in *Escherichia coli* and its degradation by Lon protease in vitro 304
- Spasov G, Christov P, Pramatarova V: Conversion of D-sorbitol to L-sorbose by cells of *Acetobacter suboxydans* immobilized in sintered glass (Short contribution) 35
- Stoppok E, Walter J, Buchholz K: The effect of pH and oxygen concentration on the formation of 3-ketodisaccharides by *Agrobacterium tumefaciens* 706
- Suemori A, Nakajima K, Kurane R, Nakamura Y: Production of 3,4-dihydroxyphthalate from phthalate by a membrane-bound two-enzyme from *Rhodococcus erythropolis* (Short contribution) 470
- Sugihara A, Senoo T, Enoki A, Shimada Y, Nagao T, Tominaga Y: Purification and characterization of a lipase from *Pichia burtonii* 277
- Suykerbuyk MEG, Schaap PJ, Stam H, Musters W, Visser J: Cloning, sequence and expression of the gene coding for rhamnogalacturonase of *Aspergillus aculeatus*; a novel pectinolytic enzyme 861
- Takano H, Takei R, Manabe E, Burgess JG, Hirano M, Matsunaga T: Increased coccolith production by *Emiliania huxleyi* cultures enriched with dissolved inorganic carbon 460
- Takano H, Arai T, Hirano M, Matsunaga T: Effects of intensity and quality of light on phycocyanin production by a marine cyanobacterium *Synechococcus* sp. NKBG 042902 1014
- Takeda M, Matsuoka H, Hamana H, Hikuma M: Biosynthesis of poly-3-hydroxybutyrate by *Sphaerotilus natans* (Short contribution) 31
- Tejayadi S, Cheryan M: Lactic acid from cheese whey permeate. Productivity and economics of a continuous membrane bioreactor 242
- Te'o VSJ, Saul DJ, Bergquist PL: *celA*, another gene coding for a multidomain cellulase from the extreme thermophile *Caldocellum saccharolyticum* 291
- Terashima M, Katoh S, Thomas BR, Rodriguez RL: Characterization of rice α -amylase isozymes expressed by *Saccharomyces cerevisiae* 1050
- Thaveesri J, Liessens B, Verstraete W: Granular sludge growth under different reactor liquid surface tensions in lab-scale up-flow anaerobic sludge blanket reactors treating wastewater from sugar-beet processing 1122
- Uemura S, Harada H: Inorganic composition and microbial characteristics of methanogenic granular sludge grown in a thermophilic upflow anaerobic sludge blanket reactor 358
- Umemura K, Atomi H, Kanai T, Teranishi Y, Ueda M, Tanaka A: A novel promoter, derived from the isocitrate lyase gene of *Candida tropicalis*, inducible with acetate in *Saccharomyces cerevisiae* 489
- Vanderberg LA, Perry JJ, Unkefer PJ: Catabolism of 2,4,6-trinitrotoluene by *Mycobacterium vaccae* 937
- van der Werf MJ, Hartmans S, van den Tweel WJJ: Permeabilization and lysis of *Pseudomonas pseudoalcaligenes* cells by Triton X-100 for efficient production of D-malate 590
- Verdoes JC, Punt PJ, Hondel CAMJJ van den: Molecular genetic strain improvement for the overproduction of fungal proteins by Filamentous fungi 195
- Vukelić B, Ritonja A, Vitale Lj: Endo-deoxyribonuclease from *Streptomyces rimosus* 1056
- Wanker E, Leer RJ, Pouwels PH, Schwab H: Expression of *Bacillus subtilis* levanase gene in *Lactobacillus plantarum* and *Lactobacillus casei* 297

- Ward C, Nolan AM, O'Hanlon K, McAree T, Barron N, McHale L, McHale AP: Production of ethanol at 45°C on starch-containing media by mixed cultures of the thermotolerant, ethanol-producing yeast *Kluyveromyces marxianus* IMB3 and the thermophilic filamentous fungus *Talaromyces emersonii* CBS 814.70 408
- Ward DJ, Somkuti GA: Characterization of a bacteriocin produced by *Streptococcus thermophilus* ST134 330
- Weber FJ, Hartmans S: Use of activated carbon as a buffer in biofiltration of waste gases with fluctuating concentrations of toluene 365
- Weir SC, Dupuis SP, Providenti MA, Lee H, Trevors JT: Nutrient-enhanced survival of and phenanthrene mineralization by alginate-encapsulated and free *Pseudomonas* sp. UG14Lr cells in creosote-contaminated soil slurries 946
- Whitman BE, Mihelcic JR, Lueking DR: Naphthalene biosorption in soil/water systems of low or high sorptive capacity 539
- Wood TM, Wilson CA: Studies on the capacity of the cellulase of the anaerobic rumen fungus *Piromonas communis* P to degrade hydrogen bond-ordered cellulose 572
- Wood TM, Wilson CA: α -(4-O-Methyl)-D-glucuronidase activity produced by the rumen anaerobic fungus *Piromonas communis*: a study of selected properties 893
- Xu J-H, Kawamoto T, Tanaka A: Efficient kinetic resolution of *dl*-menthol by lipase-catalyzed enantioselective esterification with acid anhydride in fed-batch reactor 402
- Xu J-H, Kawamoto T, Tanaka A: High-performance continuous operation for enantioselective esterification of menthol by use of acid anhydride and free lipase in organic solvent 639
- Yanase H, Okuda M, Kita K, Sato Y, Shibata K, Sakai Y, Kato N: Enzymatic preparation of [1,3-¹³C]dihydroxyacetone phosphate from [¹³C]methanol and hydroxypyruvate using the methanol-assimilating system of methylotrophic yeasts 228
- Zellner G, Feuerhake E, Jördening H-J, Macario AJL, Conway de Macario E: Denitrifying and methanogenic bacteria in the biofilm of a fixed-film reactor operated with methanol/nitrate demonstrated by immunofluorescence and microscopy 566
- Zhou X, King VM: A rapid bactometer method for screening of biocides against sulfate-reducing bacteria 336
